University *of* NORTH ALABAMA

Fall 2025 Math Problem of the Week: Problem #12

Due noon Monday, November 24
Open to all UNA undergraduates

Directions: Deliver your written solution to me (Dr. Bryant) in CPTMTH 328 by noon Monday, November 24 or, if you cannot find me, you may leave it with Ms. Phifer in CPTMTH 377. All work must be your own. You are required to justify your response fully. If you utilize a well-known theorem, state the theorem's full name and proposition, showing that the conditions of the theorem are met. Good luck!

Problem #12: Show that any three real numbers x, y, and z satisfying

$$\sin x + \sin y + \sin z = 0$$
$$\cos x + \cos y + \cos z = 0$$

also satisfy

$$\sin 2x + \sin 2y + \sin 2z = 0$$
$$\cos 2x + \cos 2y + \cos 2z = 0.$$
